

Jenny Leigh Houlroyd, CIH, MSPH, earned her joint Master of Science in Public Health in Epidemiology and Environmental and Occupational Health from the Rollins Schools of Public Health at Emory University and a Bachelor of Science in Public Health from the Richard Stockton College of New Jersey. She serves as Occupational Health Group Manager for the Safety, Health, and Environmental Services office with the Enterprise innovation Institute. As a certified industrial hygienist with the Georgia Tech Safety and Health Consultation Program, she assists small businesses throughout Georgia to ensure that their workplaces are as free from hazards as possible and that workers are protected from potential health threats. Her areas of expertise include air sampling methods for exposure to peracetic acid in poultry processing plants, promotion of occupational health and safety among young workers (14-24 years of age), occupational health and safety, workplace exposures in the recycling industry, communications with at-risk populations, hexavalent chromium, and exposures to respirable crystalline silica.

She has had extensive experience with public speaking in both the occupational and academic setting, serving as faculty for the Georgia Tech OTI Education Center, Georgia Tech's School of Biology, and for the Professional Master's in Occupational Safety and Health program. Prior to joining Georgia Tech, she worked with local governmental agencies; federal agencies; and corporate businesses. In 2019, Ms. Houlroyd enrolled as a student with the School of Public Health at UGA to pursue her doctorate in public health policy.
